

IIPH-C-E

International Institute for Primary Health Care in Ethiopia

Seblewengel Lemma (PhD)
Research Officer

"Health for All" through Primary Health Care

Outline

- **International Institute for Primary Health Care**
 - How HEP's success is interrelated to the establishment of the IfPHC-E
 - Vision, mission and objectives
 - Training activities

International Institute for Primary Health Care in Ethiopia (IIfPHC-E)

- Inauguration: February 1, 2016
- It is an institute that is closely linked to successful national program
- It is a collaborative endeavor led by the Ministry of Health of Ethiopia and
- supported technically by the Johns Hopkins Bloomberg School of Public Health
- There is a governance board from its key stakeholders
- Initial funding has been provided by the Gates Foundation

IIfPHC-E: Vision and Mission

- The **vision** of the Institute is to contribute to the revitalization of the global movement of “Health for All” through primary health care
- The **mission** of the Institute is to provide training on primary health care and to conduct PHC research

Objectives

- Provide short-term capacity-building trainings on identified needs for national and international trainees related to designing and strengthening PHC and community health programs
- Provide short-term trainings for national staff in line with the “transformation agenda” of the Government’s HSTP and woreda transformation
- Carry out need-based health systems implementation research on PHC and community-based health programs;
- Organize forums to communicate research findings, policy changes, and other updates
- Serve as a resource center for the FMOH, its Regional Health Bureaus, and other institutions in Ethiopia and beyond

Trainings Package

Trainees	Purpose	Duration
Policy makers	Understanding the magnitude of the health problem and developing a political commitment for PHC implementation	3 days (2 days of classes and 1 day of field visit)
Health programmers	Sharing of Ethiopia's best practices on how to implement PHC at the community level	2 weeks (10 days of classes and 2 days of field visits)
PHC implementers	Sharing of Ethiopia's best practices and hands-on- training for PHC implementation and lessons from case studies	6 weeks (5 weeks of classes and 1 week of field visits)
Health officers	Strengthening HSTP implementation and leadership capacity	2 weeks
